

CALLING 3RD-5TH GRADE TEACHER INNOVATORS!

Inspire your students with a love of STEM through the power of eMentorship.

TryEngineering Together is an innovative STEM eMentorship program from Cricket Media, Inc. and IEEE designed to get kids in grades 3-5 interested in STEM, and encourage them to pursue STEM careers in the future. Through the TryEngineering Together platform, students are paired one to one with professionals from engineering and technology companies in a safe, online environment. Together, students and their eMentors read STEM content and discuss STEM activities the student is doing in the classroom. The result is higher student interest and achievement in STEM.

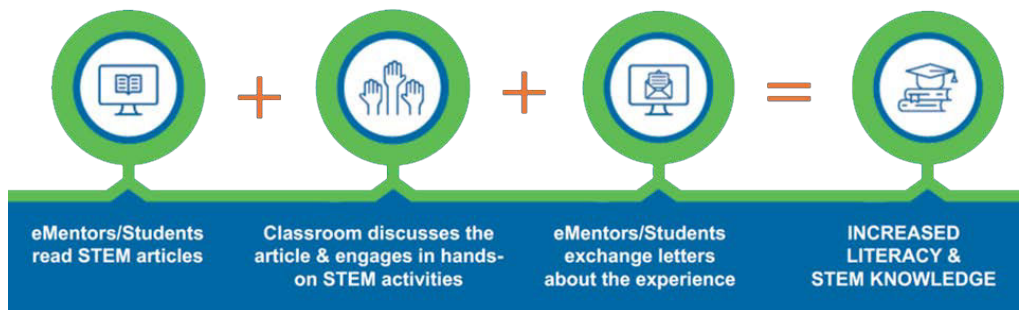

WHAT ARE THE BENEFITS?

Teachers who receive classroom grants to participate in TryEngineering Together will:

- Receive all materials needed to implement a fun, flexible immersive STEM eMentorship program in the classroom
- Have the opportunity to facilitate 1:1 personalized learning friendships between students and supportive STEM role models
- Gain access to award-winning STEM content that develops students' skills in technology, literacy, and career awareness
- Sharpen their STEM teaching skills with simple hands-on engineering design activities that promote critical thinking, collaboration, and creativity

HOW DOES IT WORK?

TryEngineering Together's multifaceted approach cultivates a rich STEM learning environment that empowers teachers and inspires students.

PILOT LAUNCHES JANUARY 2018. APPLY TODAY!
